Assignment #4

Description: Along with this description is a file named – student-mat.csv. It is a comma delimited file of Mathematics test scores for students. It is a well known data set from the UCI Data Repository. You can open it in a spreadsheet and see all of the values about the students in the experiment. From previous assignments you should know how to load a column of data into a list in Python. If you do not contact the instructor.

From analyzing the fields famrel, freetime, goout, Dalc, Walc, health and absences determine which field has the most direct correlation to the mathematics test score titled G1. Show your work.

Include your word in a Word document.

Due: The end of week 10.
